

FRONTEND REACT /MERN DEVELOPER

ONU PRINCELEY

OBJECTIVE

Frontend React/MERN Developer with a strong background in creating responsive and interactive web applications. Skilled in React.js, Redux, and related technologies. Seeking a role where I can apply my expertise in frontend development and contribute to innovative projects.

PROJECTS

eCommerce Backend

Built the backend for an eCommerce platform using Node.js and Express.js.

Integrated secure payment processing and designed a scalable database schema.

Implemented user authentication and authorization, and ensured high performance for front-end requests.

User Management System

Developed a user management system with Node.js, implementing CRUD operations and role-based access control.

Integrated front-end elements with server-side logic for a seamless user experience.

Utilized GitHub for version control and collaboration.

API Development

Designed and developed RESTful APIs for a variety of applications.

Ensured low-latency and high-availability by optimizing code and database interactions.
